PROFESSIONAL SUMMARY

Technical Lead and certified PMP with 10+ years of professional experience delivering AI-driven and geospatial systems at national scale across Saudi Arabia and Egypt. Specialized in designing scalable microservices architectures using Python while effectively steering cross-functional engineering teams using Agile and traditional project management frameworks to align technical roadmaps with strategic business objectives.

TECHNICAL SKILLS

- **Engineering & Design:** System Design, Microservices, Scalability, Distributed Systems, Cloud-native Architecture
- **Languages & Frameworks:** Python (FastAPI, Django, Flask), JavaScript (React), C++, C# (.NET Core, MVC).
- **AI & Data Science:** LLMs (GPT-4, Qwen), OCR (Tesseract), NLP, Computer Vision (YOLOv8), Weaviate, PG Vector
- **Geospatial (GIS):** ESRI (Arc Pro, Arc Server, Arc online), Hexagon (M.app Enterprise, Erdas Apollo, Erdas Essential), Opensource (OpenLayers, Leaflet, PostGIS).
- **Databases:** PostgreSQL, MS SQL Server, MongoDB, MySQL
- **Infrastructure & DevOps:** Docker, Kubernetes, CI/CD Pipelines, Linux, VPN/Firewall Security, System Administration.

PROFESSIONAL EXPERIENCE

Technical Project Lead | [Geomakani](#)

Jeddah, KSA | 04/2025 – Present

- **Led development** of an AI-powered smart archiving system using OCR and LLM-based semantic search to significantly improve document retrieval efficiency and eliminate manual processing bottlenecks
- **Architected and deployed** scalable microservices using FastAPI, Django, and Flask to power a professional enterprise web platform built from scratch
- Designed, developed, and integrated enterprise GIS applications and RESTful APIs using **Hexagon M.App Enterprise, ArcGIS Server**, and **ERDAS Apollo**, publishing geospatial services (WMS, WFS, Feature Services, OGC APIs) and integrating them with third-party enterprise applications.
- Developed and optimized geospatial search, data publishing, and API integration workflows across multiple GIS platforms to support high-performance enterprise applications.
- **Orchestrated production deployments** using Docker and Kubernetes within CI/CD pipelines to ensure high system availability and seamless scalability.
- **Mentored engineering teams** on system design best practices, resulting in improved delivery velocity and enhanced code maintainability.

Technical Project Lead | [Alqotr](#)

Riyadh, KSA | 01/2025 – 03/2025

- **Steered national-scale GIS and digital transformation initiatives** for Saudi Arabia Railways (SAR), ensuring full technical and regulatory compliance with Saudi government standards
- **Synchronized cross-functional teams** and executive stakeholders to align technical roadmaps with strategic business objectives

Project Manager (Scrum Master) | [EDGE-Pro](#)

Egypt & KSA | 01/2022 – 12/2024

- **Delivered Egypt's NSDI GeoPortal**, a national geospatial platform, by coordinating complex integrations between technical teams and government stakeholders.
- **Optimized Agile development cycles** as Scrum Master, enhancing team productivity and reducing time-to-market for national e-government services.
- **Managed a diverse portfolio** of national GIS projects, implementing automated KPI tracking and performance reporting to ensure on-time delivery

IT Manager | [EDGE-Pro](#) (NSDI Project)

Cairo, Egypt | 04/2020 – 12/2021

- **Headed IT operations** for the National Spatial Data Infrastructure project under the Military Space Administration.
- **Engineered secure infrastructure** using site-to-site VPNs and advanced firewall configurations to protect national level geospatial data assets.

Systems Branch Officer (Reservist) | [Air Force General Hospital](#)

Cairo, Egypt | 11/2017 – 03/2020

- **Headed IT department operations** and technical strategy for the hospital's Computer Science division, ensuring mission-critical system reliability.
- **Engineered and deployed** internal web and desktop applications to automate hospital management workflows and improve data accessibility.

TOP 5 IMPACTFUL PROJECTS

- **AI Smart Archiving System:** Built an intelligent retrieval system using OCR, LLMs, and PG Vector to enable conversational querying of legacy document stores.
- **AI Building Detection System:** Developed a computer vision pipeline using YOLOv8 and GIS integration to automate urban feature extraction from imagery.
- **Drive-Thru AI System:** Engineered an end-to-end AI agent involving ASR, TTS, and LLM orchestration integrated with POS systems for retail automation.
- **GOIEC Chatbot:** Developed a fully offline RAG system using web scraping, Weaviate DB, and local LLMs to provide privacy-focused enterprise assistance.
- **National Spatial Data Infrastructure (NSDI):** Architected a unified national base map and centralized geoportal to enhance inter-agency decision-making and governance.

EDUCATION

- **Master's Degree in Geo AI** | [Zagazig University](#) | 10/2025 – Present
- **Master Diploma: Machine Learning & AI** | [AMIT](#) | 09/2023 – 03/2024
- **Diploma: Open-Source Development (Python)** | [ITI](#) | 03/2020 – 06/2020
- **Bachelor of Computer Science** | [Zagazig University](#) | 09/2013 – 09/2017

CERTIFICATIONS

- [Project Management Professional \(PMP\)®](#) | Project Management Institute (PMI) | 2026
- [Oracle Cloud Infrastructure Associate](#) | 2025
- 20+ Professional Certifications in AI, GIS, and DevOps (ESRI, Mahara Tech, Hexagon, Oracle)
